

LAMENTATION DE PHILIBERT GROUP. . . FROM HAITI

This group lives in the Ferrier region of Haiti, where electricity is rare and water is very limited. The women would like to use their loan to expand their business and invest in clothing items and cosmetic products.

This month, Cascade Investment Advisors decided to focus its charitable lending efforts to a needy group in Haiti...

Since the devastating Earthquake in 2010, Haiti still faces a long road to recovery, as widespread homelessness and displacement continues to affect the country.

We believe supporting groups like the Lamentation de Philibert Group with small microloans help boost the Haitian economy, as well as create more self-sustaining communities. Cascade Investment Advisors acknowledges that the work in Haiti is far from over, and the country is still in dire need of capital influx to keep its citizens above the national poverty line.

Please join Cascade Investment Advisors in assisting developing world entrepreneurs and their communities by joining our Kiva team, "The Microlending Fund" at www.Kiva.org and engage yourself in the fight against poverty.
